EDUCATION

California State Polytechnic University, Pomona

Aug 2020 - May 2024

Bachelor of Science in Computer Science, Minor in Data Science

Pomona, CA

- GPA: 3.8

EXPERIENCE

Software Engineer

Sep 2025 – Present

Elite Innovative Solutions

Remote

- Built an enterprise-level recruiting web application using ReactJS and Bootstrap, featuring a real-time dashboard with KPI visualizations to give immediate insights into recruiting metrics and reducing manual data tracking by approximately 15%.
- Developed prototypes in Figma coordinating with user workflows, while improving usability and resolving UI issues.
- Managed application data using Cloud SQL within Google Cloud.
- Collaborated within an Agile team using JIRA for task tracking, documenting, and sprint management.

Data Science Research Engineer

Oct 2023 – May 2024

CALSys Lab

Pomona, CA

- Collected and processed large-scale cybersecurity related data using Tor browser into a PostgreSQL database.
- Developed Python automation scripts using Selenium to simulate browser interactions and BeautifulSoup for web parsing.
- Collaborated in an agile team to implement a translation component for foreign language websites, maximizing parsed content by 20%.

PROJECTS

Portfolio Website

Dec 2024 – Jan 2025

- Developed a responsive portfolio website using React and JavaScript, ensuring compatibility across all screen sizes and enhancing user experience with Lottie animations.
- Built a PHP backend and integrated PHPMailer to handle contact form submissions, enabling reliable email communication.
- Configured Docker to containerize the backend for consistent deployment and environment management.
- Implemented Google Analytics with 4+ custom events (resume downloads and page visits) to track user engagement.

Jal Recommerce Website

Jun 2024 – Aug 2024

- Collaborated within a team to deploy a web application that identifies trending clothing from popular brands and recommends alternatives.
- Developed backend functionality that scraped data from 5 major shopping websites, populated a Django database, and integrated the Google Lens API to search for visually similar clothing items.
- Designed and implemented frontend using React and JavaScript to create an intuitive and responsive user experience.

Now Playing Website

Jun 2023 – July 2023

- Built a responsive web app using React, HTML, and CSS that allows users to browse movie details and streaming availability.
- Integrated the TMDB API to dynamically fetch and display the latest films and shows.
- Developed a RESTful backend API using Node.js and MongoDB, enabling users to write movie reviews and interact with the platform.

TECHNICAL SKILLS

- **Languages:** Java, JavaScript, Python, HTML/CSS, C++
- **Libraries/Frameworks:** ReactJS, Selenium, BeautifulSoup, Bootstrap, Pandas, Numpy
- **Databases:** MySQL, PostgreSQL, NoSQL (MongoDB)
- **Tools and Software:** Visual Studio Code, Github, JIRA, WordPress, Astah UML, Adobe Suite
- **Relevant coursework:** Software Engineering, Machine Learning, AI, Analysis of Algorithms, Data Structures, Database Systems, Object Oriented Programming
